

CEMENT

BSK Global, with its expertise in providing parts, equipment, and services to Cement Industry for many years, assists Cement Manufacturers in their production, maintenance, and services needs globally.

BSK Global provides expertise in the following fields:

- Quarry and primary crushing applications;
- Storage and homogenizing;
- Material handling;
- Crushing and grinding operation;
- Pyroprocessing and cooling;
- Packaging;
- Energy management and automation operations and processes .

Parts and services provided for applications in material handling equipments (conveyors, feeders, scales, bucket elevators, airslides), crushers, ball and vertical mills, transformers, drives, motors, kilns, filters, packaging machinery and other equipment.

BSK Global, utilizing its global reach, can respond to all parts and equipment needs of cement plants. Some of the parts, systems, and services are;

- Mechanical parts and equipment; bearings, gearmotors, reducers, couplings, tools, seals, pumps, compressors, conveyors, bucket elevators , airslides, crushers, mills, and others.
- Electrical and electronics parts; Motors, generators, PLCs, drives, sensors, switches, cables, and other electrical and automation related parts.
- Cast materials (liners, diaphragms, hammers, cooler plates, hardface welding, welding electrodes).
- Steel construction material and systems; maintance and system design.
- Consumables; oils, filters and filter media, bricks, castables, grinding media, and others.
