NATIONWIDE SOLUTIONS

AUTOMATIC LUBRICATION WITHIN THE BAKING INDUSTRY

Let us show you what our team of professionals can do for you and your business.

WHY USE AUTOMATIC LUBRICATION?

- o Reduced Operational and Energy Costs
- o Reduced Maintenance
- o Time Saved
- o No More Production Stops
- o Less risk of Contamination

Scope

The Lubricus M Unit is located outside of the systems it is installed on. This enables the replenishment of oil without the need to stop the process with the addition of providing alarms at eye level. This is already in place at other Warburtons.

DESIGN

We create a design based on your need.

QUALITY

Being in a hygienic environment, quality is needed to ensure no spills or drips!

INSTALLATIONS

We can fit everything to be convenient and used to its full ability

BAKERY SPECIFIC

APPLICATIONS

- Oven Chains
- Chains on Tin Stores Robot System
- Prover Plant (Chains and Bearings)
- Dough Divider bearings and Gears
- Heat Extraction fan bearings
- Feed Conveyor Bearings
